# OUR SHOWROOM

Touching the lives of many since 1917, TOTO is the advancement of bathroom culture with a touch of heritage. Now, a global company, it remains Japanese to the core. TOTO has always ridden on the traits and benefits of Japanese culture from technology to well-being, luxury and design and has evolved into Japan's leading producer of sanitary ware. Stepping into a TOTO bathroom will transport you to the future of bathroom yet engaging you with a history of proud traditions.

Just as technology has revolutionized every aspect of contemporary life, TOTO innovations are changing people's perception and usage of bathrooms. Since its founding, TOTO has adopted the philosophy of Clean Technology with the aim to pursue unimaginable level of cleanliness, embrace technology, incorporate high aesthetic standards, protect the environment and improve modern lifestyles. With this completely new concept, TOTO has successfully expanded to the rest of the world, pioneering a new generation of bathroom products of cleanliness and an unprecedented degree of quality and authenticity.

These unparalleled bathroom products exhibit TOTO's commitment to detail and customers satisfaction. At the same time, the traditional Japanese-inspired and life-enhancing concept is clearly communicated through a whole new bathroom experience that speaks of improved lifestyle and private bliss. Toto is about keeping its heritage and reinventing the bathroom culture, totally. Suite collections TOTO knows the beauty of simplicity and the refinement of tranquility.

Continually, TOTO is creating safe and comfortable spaces for people in a busy and tense world to help them relax both physically and mentally.

## **TOWARD A DYNAMIC, VIBRANT, & EXCELLENT COMPANY**

### **TOTO IS TAKING ON CHALLENGES**

No. 1 Sanitary Ware Manufacturing Company in Japan Since 1917. TOTO-Universal Design in Everyday Living. TOTO's products are used daily by a diverse array of people. That's why we've been contemplating easy-to-use design for over 30 years, delivering products and creating spaces that are safe, comfortable and fun for all ages regardless of physical mobility. The specialized Universal Design Research Centre promotes human research and pursues new heights in user friendliness every day. This is what TOTO refers to as universal design.

### **TOTO-FOR THE EARTH & LIVING IN HARMONY WITH THE ENVIRONMENT**

Climate change inevitably has an impact on the environment, both positive and negative. While ensuring a comfortable living environment, TOTO aims to protect the natural environment as well. For this reason, development focuses on water conserving and energy saving products, as well as environmental technologies, such as photocatalyst technology, that support healthy, green living.

TOTO has set its own targets for reduction of environmental loads in all business activities from manufacturing to logistics and sales.

### **TOTO-BONDS THAT EXCEED SERVICE**

All of the products are designed to be used for a life time. That's why TOTO does more than just sell; we forge life-long bonds. Apart from superior after-sales service, TOTO proposes new lifestyle value beyond expectations in accordance with each lifecycle. Making full use of show rooms and a remodeling network has enabled strong relationships with customers. Thus, it is these personal bonds that can make your future more comfortable.

### **BUSINESS PARTNER IN QATAR**

The history of the Nabina Group stretches since 1951. Over 60 years of experience and excellence. Nabina Ceramic and TOTO have been partners for over 20 years. The existing TOTO showroom within the main Nabina Trading Showroom has been extended to 1200m<sup>2</sup> and incorporates a TOTO "Technical" Centre and a TOTO "Project" Centre. This is a first in Qatar and Middle East. This new showroom concept is being specifically designed to serve and assist Developers, Architects, Specifiers and Engineers for any project & any purpose, %100 of the displayed products will be "live". Another first in the Middle East. %100 of the products are "live" and can be tested in situ.

# VitrA

All started with a small workshop in the Istanbul district of Kartal. The year was 1942 and an eight-man team worked tirelessly to supply the country with a variety of earthenware products that couldn't be imported to Turkey during the Second World War.

VitrA supplies millions of pieces of ceramic sanitaryware each year. Fifty percent of the brand's production is sold abroad through a powerful distribution network that includes over 150 showrooms and 2,000 sales points, in major cities in over 75 countries on five continents.

VitrA

Many things have changed since the outset in 1942, but VitrA draws on its proud heritage to create contemporary bathrooms and tiles with timeless appeal and accessible luxury.

VERSACE  
CERAMICS

**VERSACE**  
CERAMICS

Gardenia was founded in 1961 in Italy and, in just a few years became a leading ceramics group operating in over 120 countries world wide. Now led by Angelo and Massimo Bonezzi, the group can boast a firmly rooted brand image thanks to a positioning strategy increasingly focused on mid-high end products. Coherently with this market strategy, the Versace Home Ceramic Collections was born in 1997 by the will and management of the chairman of the board, Mr. Massimo Bonezzi.

Through the partnership struck in 1997 with Versace, a prestigious Italian fashion designer, the Ceramiche Gardenia Orchidea group has found an inspiring affinity that has led to major achievements. The spirit uniting the two brands springs from a shared passion for interior design and the decorative home details. Even today, Gardenia's close relationship with the Milan-based fashion house is a source of great pride and inspiration.

The Collaborative venture between Gianni Versace and Gardenia Orchidea has generated a proposal in the universe that is the ceramic tile, at once authentic and original. Design that has enthused fashion shows around the world and made Versace one of the most famous and consolidated names in high fashion and design, is matched with the quality of ceramic tiles.

This is quality guaranteed by the creative talents of a company that has been for years a reference for the entire ceramic tile industry: Gardenia Orchidea.

## MARCA CORONA 1741

---

Marca Corona is an Italian tile manufacturer company who has been producing top quality ceramic flooring and wall tiles since 1741. Marca Corona is a world leader in the field of Italian ceramic tiles companies and it has always been recognized as a brand leader in the production of ceramic surfaces.

Combining extraordinary technical performances with the typical style and elegance of the best 'Made in Italy' products, Marca Corona ceramics are suitable for both residential and commercial areas, for private customers, planners and designers who are looking for that exclusive touch. Marca Corona's productions are exclusively A.S.T.M. tiles (certified by the American Society for Testing and Materials), which means their high quality is certified by the most important international organisation dealing with testing methods on different materials. We at Marca Corona believe that a company has a key role to play in today's society, operating with transparency and correctness towards all stakeholders, be they customers, suppliers or staff. For this reason we wholeheartedly decided to endorse the "Ethical Code" of Confindustria Ceramica, which commits companies to clearly state the country of origin of its products. We believe that "Made in Italy" is an emotive brand with strong values and not a mere sales slogan.

Values such as style, design, product quality, environmental as well social responsibility. Those who buy these ceramic tiles must be sure that they have been produced using technologies that respect the environment, use premium and safe raw materials and have been manufactured under the best working conditions possible.

## A LEADING COMPANY, A LEADING PRODUCER

Every year, on average, Gardenia manufactures a total of 6 million meters of ceramics, of which 2.5 Million in bi-tech and 3.5 million in fine porcelain stoneware, and over 10 million special trims.

The 450 employees who every day at the company's facilities, on a total 400,000 m2 area, enjoy a stimulating workplace that is built around a goal of constant improvement and for their safety and comfort.

The Group handles the entire manufacturing cycle, directly managing every stage of creating its ceramics, from glazes to special trims, including craftsmanship and hand decoration techniques, which are typical of the finest traditions of the sector.

The Group's sales division allows Gardenia and its brands to operate in a rapid, structured manner throughout Italy and the worldwide. Now more than ever, the company can guarantee excellent standards of efficiency in the management of its automated warehouse, which allows the material delivery in just 48 hours.

A leading company that expresses the spirit of today and hints at the style of tomorrow, Gardenia ceramics are the result of in-depth research in to materials, finishes, and decorations.

The use of highly textured natural materials like wood and marble, and the redefinition of spaces trough the uniformity and continuity of glass and metal surfaces are trends that Gardenia has captured and translated into new ceramics.

The Kludi family business was founded in 1926. What started out as a small company in beautiful Menden, developed in an ongoing process to become a business with an international outlook. Today, Kludi GmbH & Co. KG can call a total of seven production sites, eleven sales subsidiaries and six sales offices their own. Kludi has a broad base not just because of its different locations but the variety of ranges satisfies all requirements.

Kludi is a leading supplier of kitchen fittings but also of bathroom fittings, showers and hospital fittings. Kludi has made a name for itself with its brand partnerships and demonstrated further expertise where complete bathroom solutions are concerned.

Kaspar Winkler was driven by his entrepreneurial spirit when he laid the cornerstone of our company in 1910. He invented Sika1-, a quick-setting waterproofing admixture for mortar, which was used to waterproof the Gotthard Tunnel. It enabled the Swiss railway company to electrify the important connection between Northern and Southern Europe.

**INNOVATION MET DEMAND**

Kaspar Winkler recognized an upcoming global need for his groundbreaking admixtures and launched subsidiaries around the world. Already in the 1930s, 15 Sika subsidiaries in Europe, USA, Argentina, Brazil and Japan established new construction chemicals markets.

**DURABLE**

- Stress compensation & transfer
- No humidity between objects
- No corrosion

**SAFER**

- No object damage
- Installation on uneven surfaces
- Good indoor air quality, lowest VOC

**FASTER**

- Fewer tools
- Clean installation
- No initial fixing

**Nothing is perfect, it is said. Excellence is utopia...  
But all we have to do is looking around us and seeing  
the perfection present all over the planet.**

Our Unique collection imbibes the nectar, the beauty of nature. It is born from total respect and admiration for the forms, materials and textures of the earth. Our creations are inspired by lakes, forests, rocks, mountain scenes to build something totally new and unique. Only when you truly understand nature's perfection, wisdom and greatness, you are able to start conceiving something more than that.

This is how we place all our knowledge acquired over the years at the service of the purest raw materials, ensuring that the end product will be even more perfect than nature.

In our manufacturing processes we give our stone a series of new properties, which are better adapted to daily human needs: impermeability, hardness, resistance. We preserve the original values while enhancing them thanks to our creativity.

SALONI was founded in 1971 with a clear commitment to offering consumers the products they need. Saloni forms part of Obinesa, a holding also made up of lubasca (one of Spain's leading specialists in infrastructure and services through its construction, real estate and licensing activities) and an Automotive Division.

Their joint workforces total more than 3,500 people. With registered offices in castellon, Obinesa is present in Spain, Portugal, France, Italy, Poland, China and the USA, if we bear in mind the joint activities of Lubasa, the automotive Division and Saloni.

With this mind, the company strives, ongoing basis, to offer innovative products of outstanding quality and design, in keeping with market needs. Likewise, it invests constantly introducing state-of-the-art manufacturing methods. Saloni produces a wide variety of different white-body, porcelain and coloured - body products so that customers can find the one that best suits their needs.

For Saloni, tile making is a traditional legacy, updated and brought forward to the 21st century. The firm seeks to ensure that all new projects incorporate something unique for customizing living spaces and transforming houses in to a home.

Bronces Mestre, S.A. was founded in 1952 in Spain, beginning activities as a small workshop dedicated to the manufacture of high quality fittings and design.

In 1970, the Company moved to its current location in the industrial area of Judge's Farm, occupying a building over 14,000 square feet of floor area. From this moment begins a process of modernization with the installation of modern production lines of the time.

The quality of our products is what has always set the gap to the other items on the market. 100% brass and Swarovski crystal are the materials we use. Our design team is notable for its originality to create high value-added products that endure over time.

The quality standards have been the cornerstone in the history of the company, combining a modern production machinery using the latest technology and the manual work of our master craftsmen.

Our pieces are notable for the beauty and elegance of form, craftsmanship in forged and engraved products and perfection of finish famous throughout the world.

Qutone was founded in 2008 by a group of likeminded people with an aim to create meaningful existence for its patrons and to create a stature where we symbolize Global Innovation & Creativity.

The zeal of providing “World Class” Ceramic Products to Indian consumers was the stirring factor which eventually cultivated to even higher determination of becoming one of the Best Ceramic Tile Manufacturer Globally.

In our endeavor of Innovation & Revolutionize the Indian Ceramic Manufacturing Industry we installed the Latest & Most Advanced Italian Technology to manufacture Ceramic & Vitrified Tiles with Global Standards having European Designs.

Qutone is determination to become one of the best Global Ceramic Brand and always strive for outstanding quality and revolutionary design concepts to exceedingly gratify the highest aspirations of Global Consumers having fondness toward International quality, Contemporary Designs and Accentuated Aesthetics.

victoria + albert

---

volcanic limestone baths

Victoria + Albert Baths is a British brand with a worldwide reputation for creating beautiful freestanding tubs and basins.

Formed in 1996 with a passion for tubs and bathing, the organisation has a head office in the United Kingdom and dedicated South African production facilities. Today, Victoria + Albert's international roots fuse together global design, sales and marketing operations with in-house manufacturing to deliver luxurious, lasting products.

As the ultimate statement in quality and style, our model line-up is packed with inspirational free standing designs made from %100 ENGLISHCAST®, a blend of Volcanic Limestone™ and high performance resins. Naturally white, each item is individually hand-finished by craftsmen.

From the very first freestanding tub being manufactured in South Africa, Victoria + Albert Baths have strived to become innovative product developers and market leaders within the free standing tub market. New, exciting launches keep the brand at the forefront of international luxury bath design. VOLCANIC LIMESTONE™ Volcanic Limestone™ is Victoria + Albert's proprietary name for the very special white rock that is perfect for making bathtubs and vessel basins.

This is formed when the elemental forces associated with liquid magma acts upon surrounding soft, chalky limestone. The immense heat and pressure from the magma transforms the neighbouring rock into a new material made up of incredibly hard strands.

Victoria + Albert blends milled Volcanic Limestone™ with high quality resins to bind these strands into a complex 3D matrix.

Hongyu Group's journey began in Foshan in 1997. From a local stone paving production company, we are now a unique high-quality ceramic tile manufacturer in the industry. Now our business has involved tile production, real estate and cultural creativity.

We have always believed that providing better quality products is important to our customers. We always provide more value than price. Innovation is the gene for Hongyu's growth, which is the driving force for our growth for many years.

Our ceramic tile production plants are located in two cities: Foshan and Qingyuan. Production capacity is up to 100 million square meters a year. Using our excellent equipment and ISO9001 management, we ensure that each tile is of high quality.

## HISTORY

ASI was founded in Queens, New York in 1961 , then called Accessory Specialties Inc. In 1987 the Rolla family purchased ASI from the original founders and started a new chapter in ASI's history. With a disciplined approach The Rollas have taken ASI to great heights, building it into one of the largest washroom accessories manufacturer in the world.

In 2009 ASI began to market itself along with its sister companies, Global, Accurate and ASI Storage Solutions, as part of the ASI GROUP of companies ([www.asigroup.us](http://www.asigroup.us)) to become the "Single Source Solution for Partitions, Accessories and Lockers" for our customers. Together ASI have over 000, 1 employees globally.

ASI Storage Solutions, established in 2003 selling lockers for commercial projects, it has grown to become the only locker manufacturer to market, metal, plastic and phenolic lockers in the industry. ASI Storage has expanded to include shelving, cabinets and storage desks and continues to support customers who embrace it as the "One Stop Locker Shop". Huge stock of washroom accessories, products for the disabled, and hand dryers are always readily available in stock to immediately serve the Qatar market.

## HEWI SANITARY SYSTEMS

A clear, geometric style, high-quality materials, durable quality and excellent design – that's what HEWI stands for. As a market leader in multigenerational, accessibility solutions, HEWI sets standards. As a premium brand, HEWI supplies universal sanitary and hardware systems.

### Design Classic

HEWI developed the sanitary range at the beginning of the nineteen-eighties, and with it launched the first accessibility sanitary product range on the German market. Due to its timeless design and high degree of functionality, Range 801 has firmly established itself as a classic in the sanitary room and ensures universal usability.

### Classic Design

Classic design is characterised by form that is reduced to that which is essential, combined with a high degree of functionality. To this end, the product has to be adapted continuously to new requirements that arise, so that its functions remain lasting. In the case of Range 801 this is achieved by supplying new colours or material variants – for example, HEWI active+, which due to its antimicrobial finish is especially suitable for areas with the highest hygiene requirements (for instance, hospitals). The products provide effective protection against bacterial contamination. This is achieved by using microsilver, which is broadly effective against bacteria and fungi. It discharges silver ions, which inhibit the growth of bacteria and other unwanted germs.

TEJAS - COBERT is a Spanish multinational company that deals in building materials, with over 100 years of experience in the field. Uralita's strategic business areas cover items such as

Insulation materials, Plasters, Tiles and Piping. Indeed, its manufacturing and marketing of these products has made it the main reference point in the Spanish and Portuguese building sectors, and it is the third largest manufacturer of insulation materials in Europe.

At present, Cobert, which is part of Uralita, manufactures and sells clay and concrete tiles, special pieces, bricks and roof accessories. Its production operations are based in Spain and Portugal. The Cobert market, however, stretches beyond the confines of the Iberian Peninsula, as it exports its products to countries in North and South America, the Middle East, Europe, and Africa.

Cobert Roof Tiles provides the most complete range of products on the market open to being adapted to the TEJAS COBERT uralita most diverse dwellings. Their extensive range of solutions comes in a vast number of colours and profiles.

Cobert Roof Tiles is the only manufacturer in both Spain and Portugal that offers its products in different materials: clay and concrete. The company has designed a complete range of special pieces for all tile models, while at the same time providing the components for a perfect finish to all the unique points on roofs. Ongoing investment in R&D&I enables them to present the largest, unrivalled collection of tiles on the market with quality, originality, beauty, efficiency, strength and technology.

Cobert Roof Tiles provide with and select only the best raw materials, which along with the strict quality control exercised by our laboratories, have led to their roof tiles being widely recognised. They carry all the national and international certificates required for approved use in residential and non-residential building projects.

# BATi

---

**Villeroy & Boch**  
1748

In 1836, the two families of Villeroy and Boch signed a contract to jointly produce precious porcelain. The signatures on this contract symbolize the most important milestone in Villeroy & Boch history: two competing companies became one.

The Signature collections combine everything that makes Villeroy & Boch so highly acclaimed all over the world. Beginning with the careful selection of raw materials, together with long-lasting experience, precise craftsmanship and cutting-edge technology as well as rigorous quality checks. Villeroy & Boch can ensure its distinct high quality and offers one of the finest porcelain: Premium Bone Porcelain.

### MEDITERRANEAN DESIGN

There are few sites where we can enter and customize through the equipment, materials, colors and finishes. Home is a safe place to express our personality and identity. We view the bathroom as a place to pause to reconnect with our origins, a place to print the best of our land...

Surrounded by agricultural fields we feel immersed us in the tradition of cultivating the land, where patience and the care of artisans always get their fruits. Surrounded by agricultural fields we feel immersed us in the tradition of cultivating the land, where patience and the care of artisans always get their fruits.

### SANYCCES, A FUTURE BET

Through empathy and honesty, we are able to create products and spaces covering the needs of our customers. We share our ideas and points of view with other professionals in order to reach partial or complete solutions for concrete projects.

**MANUFACTURER SINCE 1951,  
NATURALLY**

Bagattini's products give to the environment warmth and elegance that blends fantasy, culture, taste, tradition and innovation. For architects and designers we provide flooring and cladding, natural stone and stone veneer, which can give their projects real unmatched value. This is our promise in terms of both product and service.  
Since 1951, naturally

We appreciate the past for what it was and for what even now continues to be, for his still valid and very adaptable ideas that could solve the most specific and demanding situations, but also as a stable and solid foundation, as a starting point for the evolution of design.

We introduce you our past that has become history, the history that has become tradition: "Classic Structure".

Ceramica Sant'Agostino was set up in 1964 near Ferrara, in an area far from the place in Emilia where most of the Italian ceramic factories are situated.

This choice meant for the company a strong project autonomy and an innovative strategic vision. The factory, always managed by the founder's family, continues to develop its research for innovative products and innovative processes.

Ceramica Sant'Agostino manufactures its products in Italy at %100 and in Sant'Agostino head office conceives and creates a wide range of high level products, able to satisfy the on going technical and stylistic market requirements.

Imagine savings in all aspects: maintenance, watering, fertilization, cutting, cleaning and replacement. It remains green all year round even in shady or very humid areas without the development of fungi.

With a guaranteed durability it is the perfect option for all problems. Give yourself and your lawnmower a break and enjoy your green areas and make your time, leisure time.
